

## Deliverable Supplement — Conference Submissions

---

**Student:** Arslan Sultan

**Employer:** Universidad Politécnica de Madrid (UPM), ETSISI

**Supervisor:** Juan Garbajosa, Professor

**Internship period:** 1 May – 31 July 2026

---

During the internship I submitted **two papers** to the **CI/HCOMP Posters & Demos** conference track in July 2026.

**Shared title:** Collective Intelligence in Agile Teams: A Transparent Simulation Testbed for Studying Team Decisions Across Sprints

**Authors:** Arslan Sultan (corresponding author), Juan Garbajosa

**Topic affiliation:** Collective Intelligence (CI); Human–AI Complementarity (HCOMP) — secondary

**Submission 1 — Demo track.** Described the transparent testbed architecture, user interaction with the software, and how the system would be demonstrated at the conference.

**Submission 2 — Poster track.** Presented the research concept: why collective intelligence is a useful lens for agile teamwork, and how a transparent simulation testbed supports academic discussion.

These two submissions documented the research testbed developed during the internship: **The Simulation of Collective Intelligence in Agile Teams: a Transparent Testbed.**
