

Progress Report — Week 4

Course: 814601S / 814311A | **Student:** Arslan Sultan | **Student number:** 1.2.246.562.24.35253236476 | **Email:** arslan.sultan@student.oulu.fi
Employer: Universidad Politécnica de Madrid (UPM) | **Supervisor:** Juan Garbajosa
Report return date: 29 May 2026

Reporting period

22 May 2026 – 28 May 2026

Hours worked

Date	Day	Hours	Activity summary
22 May 2026	Fri	8	Continued 30-paper analysis, accuracy improvement recommendations
25 May 2026	Mon	8	Drafted PRESENTATION_REPORT.md (parameters, usage, research benefits)
26 May 2026	Tue	8	Supervisor meeting — feedback on process criteria and CI structure
27 May 2026	Wed	8	Started implementation plan for new variables (effort, skills, strategy, engagement)
28 May 2026	Thu	8	Updated README and parameter documentation; refined UI labels
Total		40	

Work completed

- Completed analysis of ~30 research papers on collective intelligence, agile effectiveness, and human–AI teaming.
- Produced PRESENTATION_REPORT.md covering testbed parameters, usage guidance, and research-backed improvement directions.
- Received and documented supervisor feedback: add effort-related process, knowledge/skills process, strategy updating process, team engagement, and collective focus of attention; clarify

female proportion as social sensitivity proxy.

- Created implementation plan for integrating feedback without over-expanding scope.
 - Improved README documentation and aligned terminology with research literature.
-

Connection to learning objectives

- Evaluated myself as a learner by responding to detailed academic feedback.
 - Applied research analysis skills to improve model accuracy and explainability.
 - Worked collaboratively through supervisor meetings and iterative planning.
-

Challenges and how they were handled

Supervisor feedback introduced several new constructs simultaneously. I prioritized changes that affect CI structure first (process criteria, engagement, attention) and scheduled secondary refinements for following weeks.

Plan for next week (29 May – 4 Jun 2026)

- Implement effort management, skills/knowledge coordination, and task strategy sliders and formulas.
 - Add team engagement baseline and dynamic engagement updates.
 - Update metrics and simulation loop to use new process criteria as CI predictors.
-
