

Progress Report — Week 6

Course: 814601S / 814311A | **Student:** Arslan Sultan | **Student number:** 1.2.246.562.24.35253236476 | **Email:** arslan.sultan@student oulu.fi
Employer: Universidad Politécnica de Madrid (UPM) | **Supervisor:** Juan Garbajosa
Report return date: 12 June 2026

Reporting period

5 June 2026 – 11 June 2026

Hours worked

Date	Day	Hours	Activity summary
5 Jun 2026	Fri	8	Created new-ref.bib with Verwijs, Strode, Riedl, Kommol, Hackman
8 Jun 2026	Mon	8	Riedl (2021) predictor integration — strategy, skill, effort → CI
9 Jun 2026	Tue	8	Kommol (2025) hierarchical CI structure — memory, attention, reasoning
10 Jun 2026	Wed	8	Hackman/Wageman effectiveness and viability/sustainability refinements
11 Jun 2026	Thu	8	Updated docs and README with new theory chain
Total		40	

Work completed

- Added bibliography file `new-ref.bib` with key references: Verwijs & Russo (2023), Strode et al. (2022), Riedl et al. (2021), Kommol et al. (2025), Hackman (1987), Wageman et al. (2005).
 - Restructured CI model so collaboration process criteria predict CI subconstructs per Riedl et al. (2021).
 - Aligned three CI systems (collective memory, attention, reasoning) with Kommol, Riedl & Woolley (2025).
 - Clarified collective/shared memory vs transactive memory in code comments and documentation.
 - Updated effectiveness weighting to reflect Hackman-style multi-dimensional team success.
-

Connection to learning objectives

- Applied advanced research literature directly to model design — core university-to-work transfer.
 - Worked independently on complex conceptual changes while maintaining code consistency.
 - Understood how academic quality standards guide prioritization in a research software project.
-

Challenges and how they were handled

Integrating multiple papers with slightly different terminology caused naming inconsistencies. I created a terminology table in documentation and aligned UI labels, code variable names, and report text.

Plan for next week (12–18 Jun 2026)

- Add consequentiality and age diversity constructs.
 - Refine female proportion documentation as social sensitivity proxy.
 - Update UML and conceptual model diagrams.
-
