

Progress Report — Week 7

Course: 814601S / 814311A | **Student:** Arslan Sultan | **Student number:** 1.2.246.562.24.35253236476 | **Email:** arslan.sultan@student.oulu.fi
Employer: Universidad Politécnica de Madrid (UPM) | **Supervisor:** Juan Garbajosa
Report return date: 19 June 2026

Reporting period

12 June 2026 – 18 June 2026

Hours worked

Date	Day	Hours	Activity summary
12 Jun 2026	Fri	8	Added consequentiality slider and upstream effects
15 Jun 2026	Mon	8	Implemented age_diversity on TeamMember with CI penalty
16 Jun 2026	Tue	8	Documented female_proportion as social sensitivity proxy
17 Jun 2026	Wed	8	Refined process vs individual attribute distinction across modules
18 Jun 2026	Thu	8	Supervisor review of terminology and formula consistency
Total		40	

Work completed

- Added `consequentiality` (shared purpose) as upstream driver of engagement, shared attention, viability, and sustainability.
 - Implemented `age` on team members and `age_diversity` as negative CI predictor per supervisor feedback.
 - Documented `female_proportion` as proxy pathway through social sensitivity when direct social perceptiveness measurement is unavailable.
 - Updated `team.py`, `metrics.py`, `simulation.py`, and `app.py` with new fields and UI controls.
 - Refined distinction between team process measures and individual member attributes throughout documentation.
-

Connection to learning objectives

- Developed as a worker by incorporating nuanced academic feedback into a coherent model.
 - Applied diversity and team effectiveness concepts from research to simulation parameters.
 - Maintained systematic documentation alongside code changes.
-

Challenges and how they were handled

Adding diversity variables raised questions about ethical framing and measurement validity. I documented clearly that these are simulation proxies for research exploration, not HR evaluation tools.

Plan for next week (19–25 Jun 2026)

- Create and update UML diagrams for CI performance model.
 - Produce conceptual model documentation (`CONCEPTUAL_MODEL.md`, diagram files).
 - Begin detailed UML/CI performance analysis document.
-
