

Progress Report — Week 13 (Final)

Course: 814601S / 814311A | **Student:** Arslan Sultan | **Student number:** 1.2.246.562.24.35253236476 | **Email:** arslan.sultan@student oulu.fi
Employer: Universidad Politécnica de Madrid (UPM) | **Supervisor:** Juan Garbajosa
Report return date: 1 August 2026

Reporting period

24 July 2026 – 31 July 2026

Hours worked

Date	Day	Hours	Activity summary
24 Jul 2026	Fri	8	Final validation runs, lint checks, README polish
27 Jul 2026	Mon	8	UML analysis PDF final review and section cleanup
28 Jul 2026	Tue	8	Internship final report drafting
29 Jul 2026	Wed	8	Compile weekly report appendices and hours summary
30 Jul 2026	Thu	8	Supervisor sign-off meeting, employer testimonial request
31 Jul 2026	Fri	8	Final submission preparation, CV and profile updates
Total		40	

Work completed

- Completed final validation: smoke runs, small Monte Carlo batches, sensitivity checks on key parameters.
- Polished documentation (README, UML analysis, presentation report) for consistency after all model changes.
- Drafted final internship report covering preparation, employer context, duties, personal development, and degree programme suggestions.
- Compiled all 13 weekly progress reports with dates and hours (total internship: **520 hours**).
- Requested employer testimonial and prepared study transcript attachment for final submission.

- Updated CV and professional profiles with internship outcomes (Python, simulation, research documentation, testing).
-

Connection to learning objectives — final reflection

Objective	Outcome
Apply university knowledge	Built a full research prototype applying SE, research methods, agile, and CI theory
Develop as learner and worker	Improved feedback integration, documentation discipline, and scope management
Plan and evaluate time	Maintained weekly reporting rhythm; 35–40 h/week across 13 weeks
Work systematically	Delivered incremental milestones from core testbed to model v2.0 and submission materials
Understand work community	Followed academic quality standards, confidentiality, and reporting requirements
Future duties	Identified research software engineering, simulation/HCI, and agile effectiveness roles

Challenges and how they were handled

Final week required balancing code polish, documentation, and report writing. I prioritized mandatory deliverables (weekly reports, hours log, testimonial request) and scheduled optional enhancements for post-internship thesis work.

Internship summary

Total period: 1 May – 31 July 2026 (13 weeks)

Total hours: 520 h (40 h/week full-time)

Main deliverable: The Simulation of Collective Intelligence in Agile Teams: a Transparent Testbed (model v2.0) with documentation, tests, experiments, and conference submission materials.

Student signature: Arslan Sultan — Date: 1 August 2026

Supervisor acknowledgment: Juan Garbajosa
