

Progress Report — Week 5

Course: 814601S / 814311A | **Student:** Arslan Sultan | **Student number:** 1.2.246.562.24.35253236476 | **Email:** arslan.sultan@student.oulu.fi
Employer: Universidad Politécnica de Madrid (UPM) | **Supervisor:** Juan Garbajosa
Report return date: 5 June 2026

Reporting period

29 May 2026 – 4 June 2026

Hours worked

Date	Day	Hours	Activity summary
29 May 2026	Fri	8	Implemented effort_management process criterion
1 Jun 2026	Mon	8	Implemented skills_knowledge_coordination and task_strategy
2 Jun 2026	Tue	8	Team engagement baseline and sprint-to-sprint updates
3 Jun 2026	Wed	8	Updated CI aggregation to include new predictors
4 Jun 2026	Thu	8	Streamlit sidebar controls, validation runs, documentation updates
Total		40	

Work completed

- Added three process criteria from Marks/Mathieu action-phase literature: effort management, skills/knowledge coordination, task strategy.
 - Implemented team engagement as both baseline input and dynamic sprint outcome variable.
 - Updated `metrics.py` and `simulation.py` so process criteria influence capacity, defects, allocation quality, and CI subconstructs.
 - Extended Streamlit UI with new sliders and clearer labels distinguishing process measures from individual attributes.
 - Ran validation scenarios confirming that raising process criteria improves decision quality and completion rates.
-

Connection to learning objectives

- Applied knowledge from team process and organizational behaviour literature to software variables.
 - Demonstrated systematic, goal-oriented development through a focused implementation sprint.
 - Improved ability to translate supervisor feedback into working code and documentation.
-

Challenges and how they were handled

Some new variables overlapped conceptually with existing ones (e.g., skill diversity vs skills/knowledge coordination). I documented the distinction clearly: individual/team composition vs team process behaviour.

Plan for next week (5–11 Jun 2026)

- Add `new-ref.bib` with Verwijns, Strode, Riedl, Kommol, Hackman references.
 - Align CI structure with Riedl (2021) and Kommol et al. (2025).
 - Clarify collective/shared memory vs transactive memory terminology.
-
